

## REPORTING SOLUTIONS FOR ON-DEMAND CUSTOMERS

For Unanet On-Demand customers who want advanced analytics via queries of the database, we are pleased to introduce our **Cloud Data Warehouse** using your current JDBC/ODBC reporting tool.

**Replicated Database** The Cloud Data Warehouse consists of a replicated Oracle database (updated from your production database once daily) that can be used for custom analytical reporting or other business intelligence reporting

**VPN Access** Secure direct access to your duplicate database

**Daily Updates** The Cloud Data Warehouse is updated nightly

**Report Optimization** Any performance impact caused by resource-intensive reporting won't impact Production

**Service** The Cloud Data Warehouse covers connectivity and security maintenance

**Consulting** Consulting around the data model is available from the Unanet Technology Services Group for a fee

**Data Model** The data model can be reviewed at:
